DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8 is indefinite because the percentages, when added up exceed 100%.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Atkins Ready-to-Drink Shakes for the reasons set forth in the last Office Action.

Claims 1-4 and 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Atkins Shake Mix (New York Times, Jan. 11, 2000) in light of Atkins Cappuccino Shake Mix label for the reasons set forth in the last Office Action.

Response to Arguments

Applicant's arguments filed 03/13/03 have been fully considered but they are not persuasive.

Applicant argues that there is no motivation to add the omega fats to the prior art drinks. As admitted to by applicant, on page 7 of the instant specification, the use of omega fats is based on the Recommended Daily Allowance (RDA). Therefore, because the government suggest that it is beneficial for people to ingest omega fats on a daily basis, it would have been obvious to those of ordinary skill in the art to add omega fats to the prior art drinks.

Applicant also argues that finding the proper simple sugar substitutes is a challenge. Because applicant does not claim said sugar substitutes, the argument is not found persuasive.

Applicant argues that the claimed invention demonstrates unexpected results over the prior art products but fails to provide any details with regard to said results.

It is again noted that because the ingredients of the claimed drinks are all well known in the drink art, and in light of the holding of *In re Levin*, the prior art rejections present a *prima facie* case of obviousness.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 1761

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
